## COMMENTARY

- 10 **Guest Editorial:** Emerging and Re-Emerging Infectious Diseases: Be Prepared  
*W.G. Kohn*  
Dr. Kohn stresses the need for oral health care professionals to follow standard precautions to help prevent the spread of emerging and re-emerging infectious diseases.

## LETTERS

- 14 JADA readers explore enamel fluorosis, anterior tooth replacement and barotrauma.

## NEWS

- 17 **Caries Protection:** Tooth-binding particles may provide long-term caries protection by adhering to tooth surfaces and gradually releasing encapsulated antimicrobial agents, according to an article in the November issue of *Antimicrobial Agents and Chemotherapy*.

## COVER STORY

- 22 **Psychological Functioning:** Psychological Correlates of Medical Comorbidities in Patients With Temporomandibular Disorders  
*J.L. Burris, D.R. Evans, C.R. Carlson*  
The authors examine the relationship between medical comorbidities in patients with temporomandibular disorders and their psychological functioning.

## CLINICAL PRACTICE

- 32 **Alginate Impression Materials:** Accuracy and Dimensional Stability of Extended-Pour and Conventional Alginate Impression Materials  
*T.A. Imbery, J. Nehring, C. Janus, P.C. Moon*  
The authors conduct a study to determine whether two irreversible hydrocolloid impressions stored for five days were dimensionally accurate.
- 40 **Visual Fixation:** Eye Fixations When Viewing Faces  
*L. Hickman, A.R. Firestone, F. Michael Beck, S. Speer*  
In this study, the authors determine the location, order and duration of viewers' visual fixations on facial features in images of people whose jaw relationships were in the normal range.
- 47 **Diagnostic Challenge:** Oral Ulcerations in a Patient With Severe Asthma  
*S.S. DeRossi, K.N. Ciarrocca, F. Alawi*  
Dr. DeRossi and colleagues ask readers to diagnose a case of oral ulcerations in a woman with severe asthma.

## RESEARCH

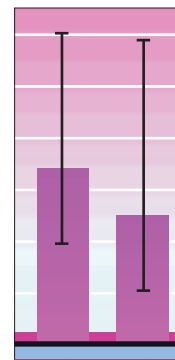

- 52 **Chairside Screening:** Dentists' Attitudes Toward Chairside Screening for Medical Conditions  
*B. Greenberg, M. Glick, J. Frantsve-Hawley, M. Kantor*  
Dr. Greenberg and colleagues assess dentists' attitudes, willingness and perceived barriers regarding chairside medical screening in the dental office.
- 63 **Air-Polishing Devices:** The Effect of Air-Polishing Abrasives on Wear of Direct Restoration Materials and Sealants  
*M.A. Pelka, K. Altmaier, A. Petschelt, U. Lohbauer*  
The authors evaluate the influence of different air abrasives on the surface damage and substance loss experienced by dental restorative materials generally used in the cervical region or as pit-and-fissure sealants.

- 71 **Tooth-Shade Matching:** Evaluating Factors That Affect the Shade-Matching Ability of Dentists, Dental Staff Members and Laypeople  
*N. Çapa, Ö. Malkondu, E. Kazazoğlu, S. Çalikkocaoğlu*  
Dr. Çapa and colleagues evaluate the influence of several dental occupational groups, professional experience, age, sex, eye color and refractive error status on tooth shade-matching ability.

- 77 **Critical Summaries:** Evidence Indicates Minimal Short-Term Space Loss After Premature Loss of Primary First Molars  
*J. DaBell, G.J. Huang*  
Drs. DaBell and Huang provide a critical summary of a systematic review article in which researchers evaluate dental arch spaces after premature loss of primary first molars.

## TRENDS

- 79 **Special Needs:** Dental Care Needs, Use and Expenditures Among U.S. Children With and Without Special Health Care Needs  
*H. Iida, C. Lewis, C. Zhou, L. Novak, D. Grembowski*  
The authors evaluate the effect of special health care needs on unmet dental care needs, type of dental care received and average dental care expenditures.

## JOURNALS CAN

*M.L. Barnett*

- 89 **Current Literature:** This feature offers summaries of selected relevant studies in the current dental and medical literature.

## PERSPECTIVES

- 93 **Clinical Dilemmas:** Too Much Tooth, Not Enough Tooth: Making Decisions About Anterior Tooth Position  
*F. Spear*  
Dr. Spear reviews the elements that dentists use to determine the correct position of the incisal edge of the maxillary central incisor to achieve restorative and esthetic success.
- 97 **A Better Practice:** Managing Staff Conflict  
*R.P. Levin*  
Dr. Levin suggests ways in which dentists can manage conflict among dental team members.
- 99 **Ethical Moment:** Is It Ethical to Claim Full Credit for an On-Site Continuing Education Course That the Presenter Shortens Significantly?  
*M.S. Lantz, K.G. Palcanis*  
Drs. Lantz and Palcanis explore the ethical issues involved in claiming full credit for a shortened on-site continuing education course.

## CONTINUING EDUCATION

- 103 JADA's continuing education program highlights psychological correlates of medical comorbidities in patients with temporomandibular disorders, the accuracy and dimensional stability of alginate impression materials, the effect of air-polishing abrasives on direct restoration materials and sealants, and factors that affect the shade-matching ability of dentists, dental staff members and laypeople.
