

Subject index

- Acrylic fibre
Thermal analysis of fibres and films in solvents and vapours 127
- Activation energy distribution
The study of glass transition in epoxy resin by thermally stimulated depolarization current. Compensation phenomenon 187
- Ammonia
A new technique for measuring surface acidity by ammonia adsorption 33
- Analysis
Proton magnetic resonance thermal analysis in coal research: A users overview 13
- Binary mixtures
Dissolution of some normal alkanes in ethylbenzene: deduction of the enthalpy of mixing two *n*-alkanes in the solid state 147
- Bioadhesion
Thermorheological and thermogravimetric analysis of bioadhesive polymer/mucin mixtures 99
- Blast furnace
The application of simultaneous TG–DTA to the determination of the fate of injected coal in a pilot-scale blast furnace simulation rig 51
- Carbopol
Thermorheological and thermogravimetric analysis of bioadhesive polymer/mucin mixtures 99
- Catalyst deactivation
Deactivation of US-Y zeolite by coke formation during the catalytic pyrolysis of high density polyethylene 45
- Catalyst
A new technique for measuring surface acidity by ammonia adsorption 33
Pyrolysis GC–MS study of external coke composition on H-ZSM-5 zeolite catalysts 57
- Catalytic degradation
Catalytic degradation of high density polyethylene: An evaluation of mesoporous and microporous catalysts using thermal analysis 65
- Catalytic pyrolysis
Deactivation of US-Y zeolite by coke formation during the catalytic pyrolysis of high density polyethylene 45
- Cell model
Prediction and experimental determination of thermodynamic properties of binary mixtures containing propylene carbonate +1,2-epoxybutane at (288.15, 298.15, and 313.15 K) 179
- Cell wall
Mechanical and thermal analysis of raisin components 71
- Cellulose acetate
Thermal analysis of fibres and films in solvents and vapours 127
- Cellulose diacetate
FTIR evolved gas analysis of the decomposition products of cellulose diacetate 107
- Cellulose
Evidence of interaction in flame-retardant fibre-intumescent combinations by thermal analytical techniques 113
- Char
Evidence of interaction in flame-retardant fibre-intumescent combinations by thermal analytical techniques 113
- Chromatin Structure
Ethidium bromide intercalation and chromatin structure: A thermal analysis 193
- Circular dichroism
Ethidium bromide intercalation and chromatin structure: A thermal analysis 193
- Clay
A new technique for measuring surface acidity by ammonia adsorption 33
- Coal injection
The application of simultaneous TG–DTA to the determination of the fate of injected coal in a pilot-scale blast furnace simulation rig 51
- Coal
Proton magnetic resonance thermal analysis in coal research: A users overview 13
- Coke
Deactivation of US-Y zeolite by coke formation during the catalytic pyrolysis of high density polyethylene 45
Pyrolysis GC–MS study of external coke composition on H-ZSM-5 zeolite catalysts 57
- Compensation phenomenon
The study of glass transition in epoxy resin by thermally stimulated depolarization current. Compensation phenomenon 187
- Core-shell latex
Modulated differential scanning calorimetry – VII: Interfacial macromolecular diffusion in core-shell latex particles 23
- Densities
Prediction and experimental determination of thermodynamic properties of binary mixtures containing propylene carbonate +1,2-epoxybutane at (288.15, 298.15, and 313.15 K) 179

Diamines

Protonation of noncyclic and cyclic diamines in aqueous solution 133

Diethyl phthalate

FTIR evolved gas analysis of the decomposition products of cellulose diacetate 107

Diffusion

Modulated differential scanning calorimetry – VII: Interfacial macromolecular diffusion in core-shell latex particles 23

DMTA

Mechanical and thermal analysis of raisin components 71

Drop calorimetry

Dissolution of some normal alkanes in ethylbenzene: deduction of the enthalpy of mixing two *n*-alkanes in the solid state 147

DSC

A new technique for measuring surface acidity by ammonia adsorption 33

A study on the interaction of water and cellulose ethers using differential scanning calorimetry 91

Ethidium bromide intercalation and chromatin structure: A thermal analysis 193

Evidence of interaction in flame-retardant fibre-intumescent combinations by thermal analytical techniques 113

Mechanical and thermal analysis of raisin components 71

Dyeing

Thermal analysis of fibres and films in solvents and vapours 127

Dynamic mechanical analysis

Thermal analysis of fibres and films in solvents and vapours 127

Enthalpy of formation

Dissolution of some normal alkanes in ethylbenzene: deduction of the enthalpy of mixing two *n*-alkanes in the solid state 147

Epoxy resin

The study of glass transition in epoxy resin by thermally stimulated depolarization current. Compensation phenomenon 187

Ethidium bromide intercalation

Ethidium bromide intercalation and chromatin structure: A thermal analysis 193

Even-odd alternation effect

Dissolution of some normal alkanes in ethylbenzene: deduction of the enthalpy of mixing two *n*-alkanes in the solid state 147

Excess functions

Dissolution of some normal alkanes in ethylbenzene: deduction of the enthalpy of mixing two *n*-alkanes in the solid state 147

Excess heat capacities

Prediction and experimental determination of thermodynamic properties of binary mixtures containing propylene carbonate +1,2-epoxybutane at (288.15, 298.15, and 313.15 K) 179

Excess molar enthalpies

Prediction and experimental determination of thermodynamic properties of binary mixtures containing propylene carbonate +1,2-epoxybutane at (288.15, 298.15, and 313.15 K) 179

Excess molar volumes

Prediction and experimental determination of thermodynamic properties of binary mixtures containing propylene carbonate +1,2-epoxybutane at (288.15, 298.15, and 313.15 K) 179

Experimental

Dissolution of some normal alkanes in ethylbenzene: deduction of the enthalpy of mixing two *n*-alkanes in the solid state 147

Faujasites

TGA-DTA study on calcination of zeolitic catalysts 39

Flame retardant

Evidence of interaction in flame-retardant fibre-intumescent combinations by thermal analytical techniques 113

FTIR evolved gas analysis

FTIR evolved gas analysis of the decomposition products of cellulose diacetate 107

Glass transition

Mechanical and thermal analysis of raisin components 71

The study of glass transition in epoxy resin by thermally stimulated depolarization current. Compensation phenomenon 187

¹H NMR

Proton magnetic resonance thermal analysis in coal research: A users overview 13

H-ZSM-5

Pyrolysis GC-MS study of external coke composition on H-ZSM-5 zeolite catalysts 57

Hydroxypropylmethylcellulose (HPMC)

A study on the interaction of water and cellulose ethers using differential scanning calorimetry 91

Intumescent

Evidence of interaction in flame-retardant fibre-intumescent combinations by thermal analytical techniques 113

Ion-exchange resin

A new technique for measuring surface acidity by ammonia adsorption 33

Isothermal microcalorimetry

Isothermal microcalorimetry near ambient temperature: An overview and discussion 1

MCM-41

Catalytic degradation of high density polyethylene: An evaluation of mesoporous and microporous catalysts using thermal analysis 65

Modulated-temperature differential scanning calorimetry

Modulated differential scanning calorimetry – VII: Interfacial macromolecular diffusion in core-shell latex particles 23

Mucin

Thermorheological and thermogravimetric analysis of bioadhesive polymer/mucin mixtures 99

***n*-alkanes**

Dissolution of some normal alkanes in ethylbenzene: deduction of the enthalpy of mixing two *n*-alkanes in the solid state 147

Painting canvases

Evaluation of the effects of environmental conditions and preventive conservation treatment on painting canvases 81

Phase separation

Modulated differential scanning calorimetry – VII: Interfacial macromolecular diffusion in core-shell latex particles 23

Poly(ethylene terephthalate)

Thermal analysis of fibres and films in solvents and vapours 127

Polyethylene

Catalytic degradation of high density polyethylene: An evaluation of mesoporous and microporous catalysts using thermal analysis 65

Polymers

Deactivation of US-Y zeolite by coke formation during the catalytic pyrolysis of high density polyethylene 45

Preventive conservation

Evaluation of the effects of environmental conditions and preventive conservation treatment on painting canvases 81

Process monitor

Isothermal microcalorimetry near ambient temperature: An overview and discussion 1

Protonation

Protonation of noncyclic and cyclic diamines in aqueous solution 133

Pyrolysis

Proton magnetic resonance thermal analysis in coal research: A users overview 13

Pyrolysis GC–MS study of external coke composition on H-ZSM-5 zeolite catalysts 57

Raisin

Mechanical and thermal analysis of raisin components 71

Rheology

Thermorheological and thermogravimetric analysis of bioadhesive polymer/mucin mixtures 99

Stability constants

Protonation of noncyclic and cyclic diamines in aqueous solution 133

Surface acidity

A new technique for measuring surface acidity by ammonia adsorption 33

Template decomposition

TGA–DTA study on calcination of zeolitic catalysts 39

TG–DTA

The application of simultaneous TG–DTA to the determination of the fate of injected coal in a pilot-scale blast furnace simulation rig 51

TG

A new technique for measuring surface acidity by ammonia adsorption 33

TGA

Evidence of interaction in flame-retardant fibre-intumescent combinations by thermal analytical techniques 113

Thermal analysis of zeolites

TGA–DTA study on calcination of zeolitic catalysts 39

Thermal analysis

Catalytic degradation of high density polyethylene: An evaluation of mesoporous and microporous catalysts using thermal analysis 65

Thermal analysis of fibres and films in solvents and vapours 127

Thermal Denaturation

Ethidium bromide intercalation and chromatin structure: A thermal analysis 193

Thermal

Proton magnetic resonance thermal analysis in coal research: A users overview 13

Thermally stimulated current

The study of glass transition in epoxy resin by thermally stimulated depolarization current. Compensation phenomenon 187

Thermodynamic properties

Protonation of noncyclic and cyclic diamines in aqueous solution 133

Thermodynamics

Isothermal microcalorimetry near ambient temperature: An overview and discussion 1

Thermogravimetric analysis

Thermorheological and thermogravimetric analysis of bioadhesive polymer/mucin mixtures 99

TMA

Evidence of interaction in flame-retardant fibre-intumescent combinations by thermal analytical techniques 113

Water distribution

A study on the interaction of water and cellulose ethers using differential scanning calorimetry 91

Zeolite

Deactivation of US-Y zeolite by coke formation during the catalytic pyrolysis of high density polyethylene 45

Zeolites

Catalytic degradation of high density polyethylene: An evaluation of mesoporous and microporous catalysts using thermal analysis 65
