

Biology of the Cell

Biology of the Cell publishes results of original work concerning the structure and the function of cells, organelles and macromolecules.

Areas of interest include all aspects of cellular and molecular biology, genetics, immunology, physiology and virology.

Especially wellcome are results obtained by complementary methodologies which

permit the comprehension of structural-functional relationships in normal and pathologic cells.

This periodical is edited by the Société Française de Microscopie Électronique and the Société de Biologie Cellulaire de France, under the auspices of the European Cell Biology Organization.
