Five good reasons to switch to Ohaus® GT toploaders.

GT Series precision balances combine all the high-tech features you need with the solid, sensible design you've come to expect from Ohaus.

☐ They're easy to operate.

Simply pressing one button lets you re-zero or calibrate. And a new FillGuide™ display lets you know at a glance how much of the balance capacity you've used. It also speeds and simplifies target weighing.

☐ They're accurate.

Movable FineRange™ available in two

models, gives you ten times more accuracy within the weighing range. And auto-tracking prevents results from drifting.

☐ They're versatile.

In the lab they'll provide consistently accurate, reproducible results. In industry their ruggedness and reliability will impress you. Weigh in grams or nine other modes, or use the GT as a counting balance.

☐ They're backed by a two-year warranty.

Solid, rapid and affordable service is

performed at the Ohaus service center. And they're made in the USA.

☐ They're easy to order.

Ask for a demo or more facts by simply calling 800-672-7722. We are Ohaus, 29 Hanover Road, Florham Park, NJ 07932.

Solid, sensible balances & scales.
