(contents continued)

Increasing of intrathecal CSF excitatory amino acids concentration following morphine challenge in morphine-tolerant rats Z.-H. Wen, Y.-C. Chang, C.-H. Cherng, J.-J. Wang, P.-L. Tao and C.-S. Wong (Taiwan)	253
Neuraminidase inhibitor, oseltamivir blocks GM1 ganglioside-regulated excitatory opioid receptor-mediated hyperalgesia, enhances opioid analgesia and attenuates tolerance in mice S.M. Crain and K.-F. Shen (USA)	260
Ischemic preconditioning does not improve neurological recovery after spinal cord compression injury in the rat T. Ondrejčák, I. Vanický and J. Gálík (Slovak Republic, USA)	267
Nitric oxide synthesis inhibition increases proliferation of neural precursors isolated from the postnatal mouse subventricular zone E.R. Matarredona, M. Murillo-Carretero, B. Moreno-López and C. Estrada (Spain)	274
Effects of hypoxia and putative transmitters on $[Ca^{2+}]_i$ of rat glomus cells R.G. Jiang and C. Eyzaguirre (USA)	285
Author Index	297
